Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5,7-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Bovi (6,382,325).

Bovi discloses a gear mechanism including a shaft, 14, side components 19 & 191 (considered tiller stars), and a means to protect against wrapping 192 which is rotatable about shaft 14 since it is not directly attached to the shaft 14 as shown in figure 2. Concerning claim 2, the means to protect against wrapping is considered to meet the limitation of having axial play since it clearly has axial play during assembly, or during disassembly such as during replacement of the cultivating members 19 & 191. Concerning claim 7, member 193 is considered a collar.

Allowable Subject Matter

Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
